

Acnetoin Plus Gel is a combination medicine that is used to treat acne. It minimizes excessive oil production, thus reduces inflammation. It also prevents the growth of the microorganisms that cause acne. This also helps to prevent pimples, blackheads, and whiteheads on the skin.

USES OF ACNETOIN PLUS GEL

- Treatment of Acne

BENEFITS OF ACNETOIN PLUS GEL

In Treatment of Acne

Acnetoin Plus Gel helps treat and control acne or pimples. It has a mild drying effect that reduces excess oil production in the face. This helps to unblock pores and prevent further acne breakouts. It also kills and stops the growth of bacteria causing acne. Acnetoin Plus Gel usually takes a few weeks to have a noticeable effect so keep using it even if it appears not to be working. Using this medicine will help improve your mood and uplift your confidence as acne reduces.

HOW ACNETOIN PLUS GEL WORKS

Acnetoin Plus Gel is a combination of two medicines: Clindamycin and Isotretinoin which treat pimples (acne). Clindamycin is an antibiotic which works by penetrating into the skin and killing acne-causing bacteria. Isotretinoin is a form of vitamin A. It works by reducing oil production in the skin, replenishes acne-prone skin and helps keep your pores open.
