Say goodbye to uneven skin tone and texture with this effective blend. Lactic acid, an alpha-hydroxy acid (AHA), works to gently resurface the skin, fading the look of hyperpigmentation and age spots for a more uniform tone. Combined with azelaic acid's ability to regulate melanin production, this product helps prevent future discoloration and promotes a brighter, more radiant complexion. This powerful combination offers a comprehensive approach to improving skin clarity and reducing the visibility of imperfections, leading to a more confident and self-assured you.

This carefully formulated blend of lactic and azelaic acid is suitable for various skin types, including sensitive skin, although a patch test is always recommended before first use.
